

It comes as no surprise that certain factions would seek special exceptions to our telephone privacy act. The only question is whether the Attorney General, the Legislature & the Governor will have the backbone to deny these attempts to invade our homes as they always did, now & in the future. Please don't let this wonderful law be diluted with one exception after another, year after year, in every session of the General Assembly. Once you start that snowball, there will be no stopping it. If anyone wants to do business with those people, it's easy enough to find them in other ways without compromising our peace of mind or our time with friends and family at dinner time.
